

1.Q. Concerning the subtopic H-SB08.1-002, what particular biological agents, explosives, and/or chemicals are expected to be monitored, if any? Additionally, would demonstrating the ability to detect one of these entities during phase 1 be sufficient, or is the ability to monitor multiple analytes required?

1.A. There is no specific list of particular agents for which detection is required. Any proposed agent(s) should be complementary to the proposed technical approach for detection.
